Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Hamaguchi, 6,862,213.

Hamaguchi, 6,862,213, discloses in Fig. 1 a memory device comprising:
a plurality of memory cells each including: MOS transistor 23A and variable resistor 23B, which is formed of a material having a perovskite crystalline structure that provides the resistance value being varied with the applied voltage (see lines 1-7 and 54-57, column 7; lines 5-29, column 8); therefore, it is seen to read on the feature of "a resistance value thereof reversibly changed in accordance with a voltage applied thereto";
main array row decoder 22 providing the programming word line voltage to the word line (see lines 38-64, column 9) and program circuit 18 providing programming/reprogramming (erased) bit line voltage to the bit line (see lines line 6, column 9), therefore, both circuits 18 and 22 are seen to be able provide both operations as recited in claims 7-8;

the flowchart showing the program and verify operations, as shown in Fig. 3, read on method claims 8-10.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hirai, 6,614,682, Iwata, 6,625,057, and Ignatiev et al., 6,473,332.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to TRONG PHAN whose telephone number is (571) 272-1794. The examiner can normally be reached on M-F (8:30-5:00).
